

Antibody & IgG Products

IMMUNOLOGY R&D BIOLOGICAL SOLUTIONS

Innovative Research provides high-quality biological materials and immune-focused reagents designed to support scientists across basic research, translational studies, and pre-clinical development. For over 25 years, our immunology portfolio has been used by academic laboratories and biotechnology companies worldwide.

ANTIBODY & IGG PRODUCTS (HUMAN & ANIMAL)

Our IgG portfolio supports antibody characterization, Fc receptor research, complement pathway studies, and therapeutic antibody development.

Available Options:

- Human IgG subclasses IgG1, IgG2, IgG3, IgG4
- Animal IgG (multiple species available including mouse, rabbit, and more)
- Native and purified formats
- Select disease-state options (humans)

WHY IMMUNOLOGY SCIENTISTS CHOOSE INNOVATIVE RESEARCH

- Reliable, research-grade biological materials
- Consistent supply chain supporting long-term studies
- Detailed product documentation and characterization
- Responsive technical and customer support
- Trusted by leading academic, biotech, and pharmaceutical organizations

Cytokines & Immune Signaling Proteins

IMMUNOLOGY R&D BIOLOGICAL SOLUTIONS

Innovative Research provides high-quality biological materials and immune-focused reagents designed to support scientists across basic research, translational studies, and pre-clinical development. For over 25 years, our immunology portfolio has been used by academic laboratories and biotechnology companies worldwide.

CYTOKINES & IMMUNE SIGNALING PROTEINS

Support immune pathway and cell signaling research with biologically active cytokines and immune mediators.

Portfolio includes:

- Pro-inflammatory and anti-inflammatory cytokines
- Chemokines and immune growth factors
- Recombinant and native formats (select products)

WHY IMMUNOLOGY SCIENTISTS CHOOSE INNOVATIVE RESEARCH

- Reliable, research-grade biological materials
- Consistent supply chain supporting long-term studies
- Detailed product documentation and characterization
- Responsive technical and customer support
- Trusted by leading academic, biotech, and pharmaceutical organizations

Cerebrospinal Fluid (CSF)

IMMUNOLOGY R&D BIOLOGICAL SOLUTIONS

Innovative Research provides high-quality biological materials and immune-focused reagents designed to support scientists across basic research, translational studies, and pre-clinical development. For over 25 years, our immunology portfolio has been used by academic laboratories and biotechnology companies worldwide.

CEREBROSPINAL FLUID (CSF) – HUMAN & NON-HUMAN PRIMATE

Essential for neuroimmunology, neurodegeneration, and CNS biomarker research.

Available Materials:

- Human CSF
- Non-human primate CSF
- Normal and select disease-state availability
- Multiple volume formats

WHY IMMUNOLOGY SCIENTISTS CHOOSE INNOVATIVE RESEARCH

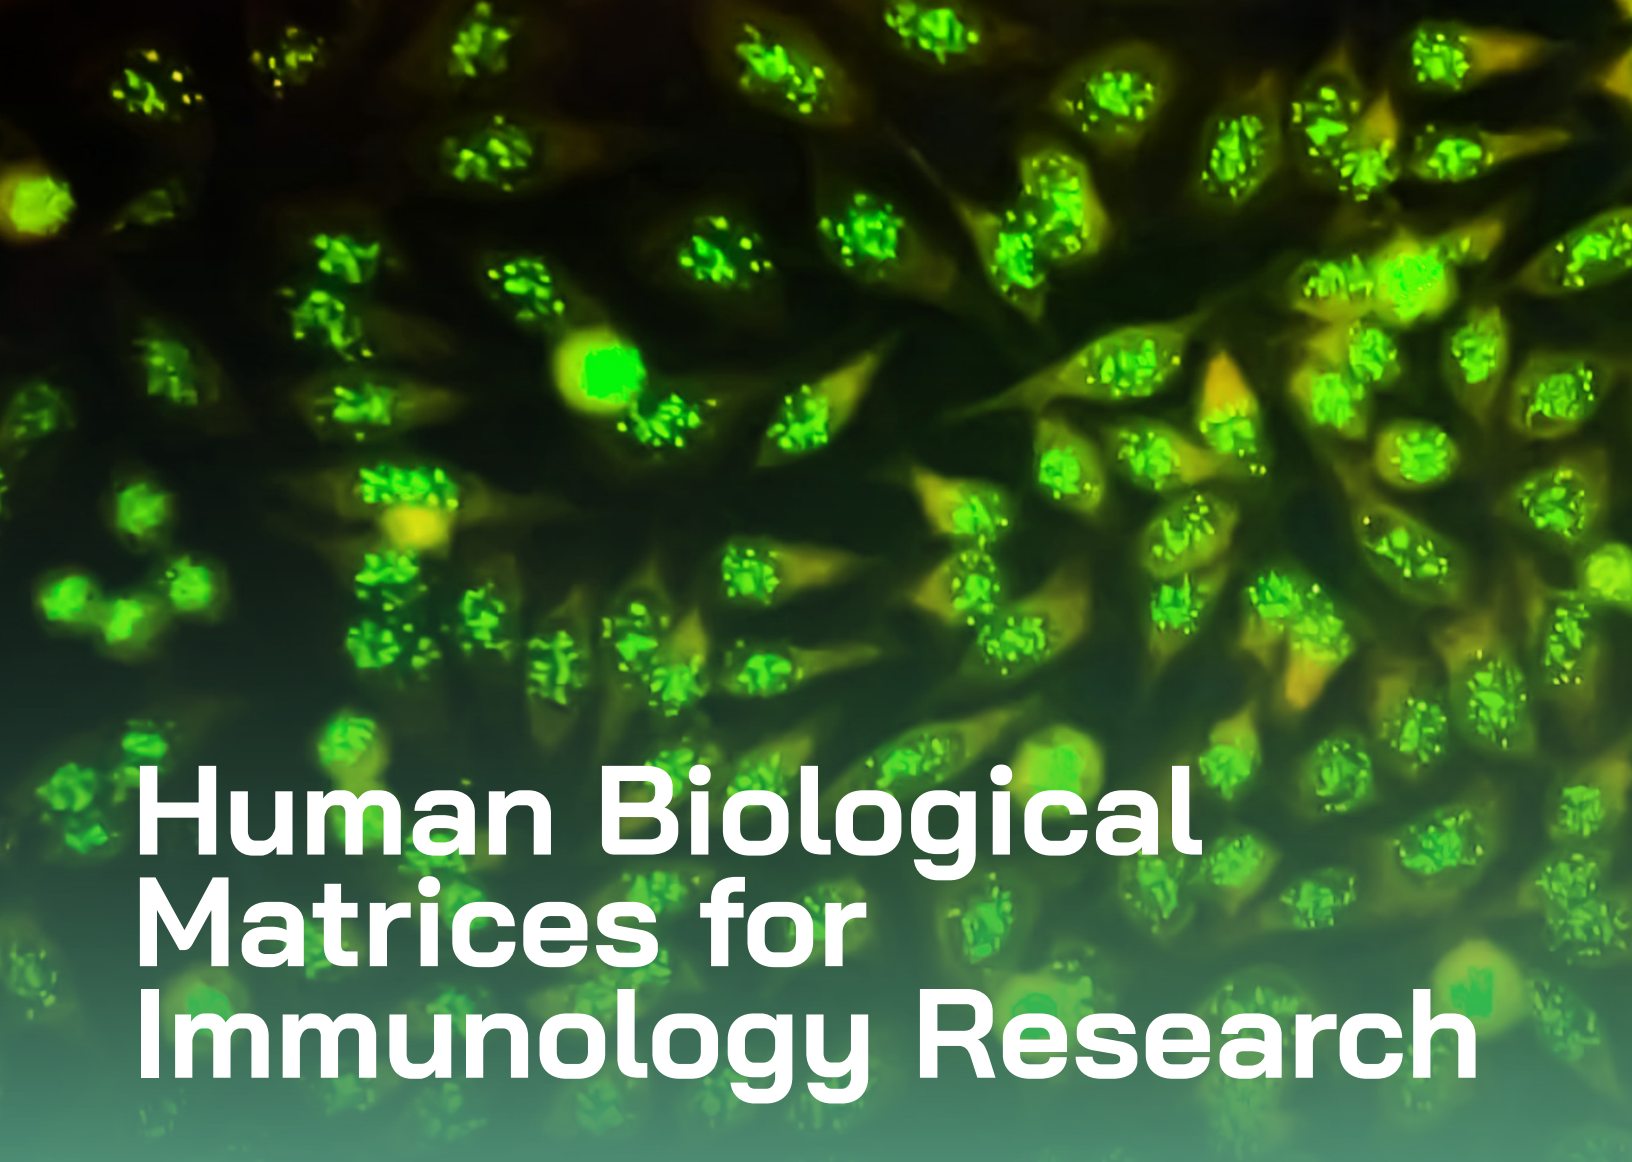

- Reliable, research-grade biological materials
- Consistent supply chain supporting long-term studies
- Detailed product documentation and characterization
- Responsive technical and customer support
- Trusted by leading academic, biotech, and pharmaceutical organizations

Human Biological Matrices for Immunology Research

IMMUNOLOGY R&D BIOLOGICAL SOLUTIONS

Innovative Research provides high-quality biological materials and immune-focused reagents designed to support scientists across basic research, translational studies, and pre-clinical development. For over 25 years, our immunology portfolio has been used by academic laboratories and biotechnology companies worldwide.

HUMAN BIOLOGICAL MATRICES FOR IMMUNOLOGY RESEARCH

- **Human Buffy Coat** — Ideal for immune cell isolation and functional immune assays
- **Human Plasma** — Supports complement, biomarker, and circulating immune factor studies
- **Human Serum** — Gold standard matrix for antibody and serology research

WHY IMMUNOLOGY SCIENTISTS CHOOSE INNOVATIVE RESEARCH

- Reliable, research-grade biological materials
- Consistent supply chain supporting long-term studies
- Detailed product documentation and characterization
- Responsive technical and customer support
- Trusted by leading academic, biotech, and pharmaceutical organizations
