

# Ristocetin A Sulfate

High-quality material for research and further manufacturing applications

For Further Manufacturing, Processing, or Research Use Only

## PRODUCT OVERVIEW

Ristocetin A Sulfate is a glycopeptide material derived from *Nocardia lurida*. American Biochemical & Pharmaceuticals supplies Ristocetin A Sulfate as a high-quality raw material for research and further manufacturing applications. ABP supports customers with lot-specific quality documentation, product traceability, technical documentation, and international supply support.

### PRODUCT INFORMATION

- **Product:** Ristocetin A Sulfate
- **Source:** *Nocardia lurida*
- **Form:** Powder
- **Available sizes:** 100 mg and 1 g
- **Documentation:** Lot-specific Certificate of Analysis

### LOT-SPECIFIC QUALITY TESTING

- **Identification by HPLC**
- **Assay by HPLC**
- **Moisture testing**
- **Appearance and other applicable QC parameters**

## RESEARCH USE

Ristocetin A Sulfate is supplied for further manufacturing, processing, or research use only. Product specifications and lot-specific quality documentation are available upon request.

## AVAILABLE FORMATS

**6 x 100 mg Vials**  
Convenient format for research requirements

**1 g Vial**  
Bulk format for larger research requirements and further manufacturing applications

## QUALITY & SUPPORT

- Lot-specific Certificates of Analysis
- Product traceability
- Technical documentation
- International supply and logistics support
- Bulk and recurring supply options

EU REGULATORY NOTICE  
FOR FURTHER MANUFACTURING, PROCESSING, OR RESEARCH USE ONLY

For specifications, availability, quotations, or technical documentation, please contact American Biochemical & Pharmaceuticals or one of our designated distributors.
